WORK EXPERIENCE

Dynatrace   **Jan. 2022 – Present**
Senior Platform Developer Advocate   *Vienna, Austria*

- As a Senior Developer Advocate, I create and improve our current processes related to Documentation, workshops and enablement. It includes:
  - Creating and owning the content style guide for https://developer.dynatrace.com.
  - Finding processes in documentation contributions that can be automated by introducing tools like Vale linter, and Renovate Bot. The Renovate bot change reduced the time to update API docs for new versions from *48 hours* to *3 hours*.
  - Onboarding other writers and contributors on the [Divio documentation system](#).
  - Enabling developers on Dynatrace's new platform by conducting workshops. I was the host of 15 workshops where I enabled around *200 developers*.
  - Conducting partner webinars. I've enabled around *1300 developers* from partner organizations.
  - Creating video enablement material such as the [Learn DQL series](#) that amassed more than *9K views*.
- Technologies I use: React, TypeScript, Markdown, Git, Gitpod, Vale linter, Divio documentation system, and Microsoft style guide.

Ubiq   **August 2020 – Dec 2021**
Senior Software Developer   *Vienna, Austria*

- I introduced continuous delivery for Ubiq's frontend app. It reduced the deployment time to almost $1/10th$. The deployment count also increased by *4 times*.
- I decoupled the backend and frontend logic to be able to deploy separately. That helped with the separation of concern and frictionless collaboration between developers.
- I took an additional role to work on the company mobile app during a transition period between new hires.
- Technologies I used: Jenkins, React, TypeScript, Azure, and Postgres.

Greentube   **June 2017 – July 2020**
Mobile App Developer   *Vienna, Austria*

- I created mobile apps with Ionic/Cordova.
- I worked on frontend web apps with Angular.
- I also reverse-engineered legacy tools and converted them to modern technology stacks.

EDUCATION

Guru Nanak Dev Engineering College, Ludhiana   **April 2014**
Bachelor of Technology in Computer Science and Engineering   *Ludhiana, India*

- Completed it in *First division with Distinction*.
- Participant in Singing competitions and youth festivals.

Guru Nanak Dev Polytechnic College, Ludhiana   **April 2011**
Diploma in Computer Engineering   *Ludhiana, India*

- Completed it *with Honors*.
